

Critical Information Summary: NBN

About the Service

The NBN service is a broadband internet service which uses the NBN Fibre (FTTP, FTTB, FTTN, FTTC or HFC) Network to deliver internet connectivity to the Network Boundary Point at your premises.

Included Features

There are a range of value-added features included with NBN plans, with further details here: www.westnet.com.au/nbn

- NBN Phone offered
- Unlimited data on selected plans
- No excess quota usage charges
- 24/7 customer service

Minimum Term

NBN plans are supplied on no lock-in contract.

Early Cancellation Fees

- There are no cancellation fees for no lock-in contracts, however, you may be required to pay out the cost of your modem (refer to Total Minimum Charge under the Plans table below).
- Cancelling the NBN service will also cancel any other Westnet products that are only available with NBN. Should those products have their own contract, you are liable for their associated break fees.

Withdrawal Fees

- If you withdraw an order that you placed with us you will need to pay a \$60 withdrawal fee.
- You will also need to pay for any hardware that we have supplied to you, unless it is returned to us in its original condition.
- If you have selected to purchase a Fetch plan from us, the Fetch Setup fee paid will be credited back to your account once the Fetch Set Top box is returned to us in its original condition.

advise you if your modem is compatible during selection of your NBN plan.

- Any cabling that is required in your premises beyond the Network Boundary Point is your responsibility. Standard installations are completed without charge to you. Non-standard, additional or subsequent installations may require you to pay additional charges.

NBN Speeds

- FTTN, FTTC & FTTB speeds to be confirmed when active. Actual speeds may vary due to many factors including type/source of content being downloaded, hardware and software configuration, the number of users simultaneously using the network and performance of interconnecting infrastructure not operated by Westnet. Devices connected by WiFi may experience slower speeds than those connected by Ethernet cable. Learn more: <https://help.westnet.com.au/speeds-nbn-explained>
