Requirements & Availability

The NBN Wireless service is only available within an NBN Fixed Wireless service area. NBN Wireless availability can be checked using our online coverage calculator: www.westnet.com.au/internet/broadband/nbn/coverage/

You need to purchase a Westnet modem to use the included NBN Phone service. The modem costs \$99.95 on a no lock-in contract (discounted to \$59.95 if you take a 6 month contract or if you are an existing customer) plus \$10 delivery fee. The Westnet modem is WiFi enabled for connecting wireless devices. If you choose to use your own modem, you will be able to use the NBN service but the NBN Phone service will not work on a third party modem.

You will also need a standard phone handset (approved for use in Australia) to use your included NBN Phone service.

Actual speeds may vary due to many factors including type/source of content being downloaded, hardware and software configuration, the number of users simultaneously using the network and performance of interconnecting infrastructure not operated by Westnet. Devices connected by WiFi may experience slower speeds than those connected by Ethernet cable. You can learn more about NBN speeds here: <https://myhelp.westnet.com.au/node/1699>
