

Critical Information Summary: Off-Net ADSL Broadband

Information About The Service

If we're unable to connect you to the Westnet Network, we can still provide you with up to ADSL2+ speeds via our residential Off-Net ADSL2+ plan range.

Requirements & Availability

ADSL requires a basic telephone service in order to function. You can use a suitable telephone service from another provider, or you can use the Westnet Home Phone service and bundle it with our ADSL2+ Off-Net plans for no additional monthly charge. The Critical Information Summary for Home Phone can be found at www.westnet.com.au/about/legal/cis/cis-homephone.pdf

You will require an ADSL modem to connect your service. If you don't already have one, you can purchase a modem from Westnet for \$59.95 (\$10 delivery fee applies).

Service availability can be checked using our online coverage calculator: www.westnet.com.au/internet

To ensure you're always connected to the best product available, we may need to change your service, for example, when an upgraded service (like our NBN Fibre service) becomes available. If this happens, we'll inform you ahead of any changes.

ADSL2+ Off-Net plans are available on a no lock-in contract.
