

## Critical Information Summary: On-Net ADSL Broadband

### Information About the Service

Westnet ADSL2+ is a residential service that delivers high-speed broadband nationwide via our own broadband network.

#### Requirements & Availability

ADSL2+ requires a basic telephone service in order to function. You can use a suitable telephone service from another provider, or you can use the Westnet Home Phone service and bundle it with our ADSL2+ plans for no additional monthly charge. The Critical Information Summary for Home Phone can be found at

[www.westnet.com.au/legal/cis/cis-homephone.pdf](http://www.westnet.com.au/legal/cis/cis-homephone.pdf)

You will require an ADSL modem to connect your service. If you don't already have one, you can purchase a modem from Westnet for \$59.95 (\$10 delivery fee applies).

ADSL2+ availability can be checked using our online coverage calculator: [www.westnet.com.au/internet](http://www.westnet.com.au/internet)

To ensure you're always connected to the best product available, we may need to change your service, for example, when an upgraded service (like our NBN Fibre service) becomes available. If this happens, we'll inform you ahead of any changes.

#### Minimum Term

ADSL2+ plans are available on a no lock-in contract.

#### Included Features

There are a range of value-added features included with Westnet ADSL2+, with further detail on the website:
