

Critical Information Summary:

NBN

Information About The Service

The NBN service is a broadband internet service which uses the NBN Fibre (FTTP, FTTB, FTTN or HFC) Network to deliver internet connectivity to the Network Boundary Point at your premises.

With every NBN plan we include our Netphone (Voice over IP) phone service at no additional cost, offering great call rates and call inclusions depending on your plan of choice. The Critical Information Summary for Netphone can be found at:

www.westnet.com.au/about/legal/cis/cis-nbn-netphone.pdf

Requirements & Availability

The NBN service is only available within an NBN (FTTP, FTTB, FTTN or HFC) ready service area. NBN availability can be checked using our coverage checker at www.westnet.com.au/internet/broadband/nbn/coverage/

You will require an NBN ready modem, with support for all types of NBN services. Your modem will need to be WiFi or VoIP enabled if you want to connect wireless devices or make use of your included Netphone service. NBN HFC services require you to purchase a Westnet modem (which is WiFi and VoIP enabled).

You will also need a standard phone handset (approved for use in Australia) to use your included Netphone service.

Minimum Term

NBN plans are available on either a no lock-in contract, or on a 24 month contract. A 24 month contract offers an included WiFi modem, as well as \$0 activation (\$79.95 on a no lock-in contract).

- NBN Speeds:** FTTN & FTTB speeds to be confirmed when active. Actual speeds may vary due to many factors including type/source of content being downloaded, hardware and software configuration, the number of users simultaneously using the network and performance of interconnecting infrastructure not operated by Westnet. Devices connected by WiFi may experience slower speeds than those connected by Ethernet cable. Learn more about NBN speeds at <http://myhelp.westnet.com.au/node/1699> Basic, Turbo and MAX indicate the underlying NBN wholesale connection speed tier and translate to the typical speeds below.

| Speed Tier | Typical Evening Speeds (7pm – 11pm) | |
|----------------------|--|---------------|
| | Download speeds | Upload speeds |
| Basic (nbn12) | 10.6Mbps | 1Mbps |

Setup Fee

The below activation fee is applicable when signing up to an NBN plan.

| Service | Details | Charge (No lock-in contract) | Charge (24 month contract) |
|---------------------------------------|----------------|------------------------------|----------------------------|
| NBN (FTTP, FTTB, FTTN and HFC) | Activation Fee | \$79.95 | \$0 |

Any cabling that is required in your premises beyond the Network Boundary Point is your responsibility. Standard installations are completed without charge to you. Non-standard, additional or subsequent installations may require you to pay additional charges.

Excess usage

Both uploads and downloads count towards your monthly included data. There are no automatic excess usage charges on NBN – instead, traffic beyond the included data will be slowed (shaped) to 256/256kbps for NBN 500 Basic. Unlimited plans are not shaped. You may purchase additional data if required: for more information, see

Cancellation Fees

- Applies to 24 month contract term only - the maximum applicable break fee is \$300 within the first 6 months. The below NBN break fees apply thereafter. These fees cover the costs reasonably incurred by Westnet when the contract commenced.
- Cancelling your NBN service will also cancel any other Westnet products you've purchased that are only available when bundled with NBN. Should those products have their own contract, you are liable for their associated break fees.

| Contract Break Fees | Tenure | | | |
|---------------------|--------------|---------------|----------------|----------------|
| | 0 – 6 months | 7 – 12 months | 13 – 18 months | 19 – 24 months |
| 24 month contract | \$300 | \$225 | \$150 | \$100 |

Other Information

Usage Information

Customers can obtain information on their NBN usage at <https://myaccount.westnet.com.au/>

NBN Access Technologies

Our NBN service can be delivered over the NBN Network to your premises via Fibre to the Premises (FTTP) as Ethernet, Hybrid Fibre-Coaxial (HFC) as Ethernet, Fibre to the Basement (FTTB) as VDSL2 or Fibre to the Node (FTTN) as VDSL2.

More information on NBN access technologies is available at www.westnet.com.au/internet/broadband/nbn/about/

Battery Backup and Power Outages

Your NBN service does not include a battery backup. This means your household will be unable to access any internet and telephony services provided by nbn™ during a power outage. This includes making calls to emergency service numbers like 000. Please ensure you have alternate ways of making calls, such as a mobile phone.
