

CRITICAL INFORMATION SUMMARY:

Business Cable

Information About The Service

The Cable (formerly referred to as HFC) Broadband service is a broadband internet service delivered using Hybrid Fibre-Coaxial Cable. The service is connected to your premises to deliver Internet connectivity.

Required Services & Availability

The Cable service is only available within certain Cable serviceable areas, located in Ballarat, Geelong and Mildura. Standard installations are done without charge to you provided you enter into a 24 month contracted term with iiNet.

You will require a router if you need to connect multiple devices at once. The router will need to be WiFi or VoIP enabled if you need to connect wireless devices or a VoIP telephone service to your Cable broadband connection. If you don't already have one, iiNet can sell or rent you a suitable device at an additional cost.

Minimum Term

Cable plans are available on either no fixed term, or on a 24 month agreement. A 24 month agreement gives access to discounted hardware, as well as \$0 setup for a standard installation.

Included Features

There are a range of value-added features included with Business Cable, with further detail on the website.
