

Critical Information Summary:

iiNet Cable

Information About The Service

The Cable service is a broadband internet service which uses Hybrid Fibre-Coaxial Cable to deliver internet connectivity at the Network Boundary Point at your premises.

With every iiNet Cable plan we also include Netphone at no additional cost. Netphone is our Voice over IP (VoIP) service which includes your local and standard national calls. Typically you can transfer your existing landline number to Netphone. Further information on Netphone is available at: www.iinet.net.au/about/legal/cis/cis-voip.pdf

Requirements and Availability

iiNet Cable is only available within certain Cable serviceable areas, located in Mildura, Geelong and Ballarat. Standard installations are done without charge to you provided you enter into a 24 month contracted term with iiNet.

You will require a Fibre-compatible router if you want to connect multiple devices at once. The router will need to be WiFi or VoIP enabled if you want to connect wireless devices or make use of your Netphone service. On a 24 month contract iiNet can provide you with a WiFi modem at no additional cost.
