- Total Minimum Charge on no lock-in contract with BYO modem is one month of plan rental plus the \$79 activation fee.

### Information About The Service

#### Service Description

The Fibre to the Home (FTTH) service is a broadband internet service which uses the Optical Fibre Access Network to deliver internet connectivity at the Network Boundary Point at your premises. There are a range of value-added features included with FTTH plans, with further details here [here](#).

- Netphone offered (with iiNet supplied modem)
- Unlimited data
- No excess quota usage charges
- 24/7 customer service

#### Minimum Term

FTTH plans are available on a no lock-in contract with \$79 activation fee.

#### Early Cancellation and Hardware Fees

There are no cancellation fees for no lock-in contracts.

Cancelling your FTTH service will also result in a cancellation of any other iiNet products you've purchased that are only available when bundled with FTTH. Should those products have their own contract, you will be liable for their associated break fees.

If your order is withdrawn after receiving the Modem we supplied to you, then you will need to return the Modem to us in Good Working Order within 21 days of cancellation/withdrawal. If you do not return the Modem, then you will be charged a Modem non-return fee of \$114.95, which is the total cost of the Modem.

#### Availability

The FTTH service is only available within an FTTH ready service area. Use our coverage checker [www.iinet.net.au/home](http://www.iinet.net.au/home) to check FTTH availability at your address. Use our [coverage checker](#) to check FTTH availability at your address.

#### Equipment Required

You will require a compatible modem that is Wi-Fi enabled to connect with wireless devices. You may purchase the iiNet modem for \$114.95 (\$0 delivery fee applies) or bring your own compatible modem. To be provided a working netphone service, you need a standard phone handset (approved for use in Australia) and you must purchase the iiNet modem. If you are an existing customer, you may be able to use your existing modem – we can advise you if your modem is compatible.

Installation of the Optical Network Terminating Unit (if not present) or cabling that is required in your premises beyond the network boundary point is your cost and responsibility

#### FTTH Speeds

Typical Evening Download Speeds are subject to change and are measured 7pm-11pm. Typical Evening Upload Speeds are estimated by reference to the maximum upload speed. Speeds are not guaranteed and may vary.

Actual speeds may vary due to many factors including type/source of content being downloaded, hardware and software configuration, the number of users simultaneously using the network and performance of interconnecting infrastructure not operated by iiNet. Devices connected by WiFi may experience slower speeds than those connected by Ethernet cable. Learn more about FTTH speeds [here](#).

#### Call Packs

We offer our netphone service on a Pay As You Go basis at no additional cost to customers that purchase the Modem with their plan and existing customers who reuse their compatible iiNet supplied modem. Great value call packs are available at an additional monthly fee on all FTTH plans.

See full list of FTTH Phone call rates [here](#).

Critical Information Summary for VOIP Phone [here](#).

Great value call packs (as below) are available at an additional monthly fee. [Acceptable Use Policy](#) applies.

Call Packs	Call Pack Inclusions	Monthly Charge
Basic	<ul style="list-style-type: none"> <li>Unlimited local calls (excluding 13/1300 numbers and calls to Directory Assistance (1223)), unlimited standard national calls and unlimited national calls to mobiles</li> </ul>	\$5
