Coverage

You can only obtain 4G speeds when you use a 4G-ready phone (LTE 1800/850 MHz) in 4G coverage areas. See our coverage map at www.westnet.com.au/mobile-coverage.

When you are not within a 4G coverage area or your mobile handset is not 4G compatible, the mobile service will automatically switch over to 3G and speeds will be much less than that of 4G. Actual speeds vary due to factors such as location, distance from the base station, local terrain, user numbers, hardware & software configuration, and download source/upload destination.
