IINET GROUP CRA – IPTV SERVICE DESCRIPTION

2. THE IPTV SERVICE

What is the IPTV Service?

- 2.1 IPTV is a Service through which digital television is delivered over the Internet to a Premises in Australia, and may include services such as live television, time-shifted programming, Video On Demand Content and interactive applications. The Service is accessed using a Set Top Box.

Contract Term

- 2.2 Unless you withdraw your Application in accordance with clause 5.4, your agreement with us (our CRA) commences when we accept your Application.
- 2.3 We will provide, and you must acquire, the Service in accordance with our CRA for at least the Contract Term specified in your Application. You may cancel the Service during the Contract Term but you may be required to pay a Break Fee as set out in the Pricing Schedule. After the Contract Term, we will continue to provide the Service until it is cancelled in accordance with our CRA.

3. ELIGIBILITY FOR THE IPTV SERVICE

Service Qualification

- 3.1 To be eligible for the Service, you must meet the Service Qualification requirements (see clauses 3.3 to 3.15) before we can accept your Application. If you do not meet these requirements, you will not qualify for the Service. These requirements may change from time to time (we will notify you in accordance with clauses 1.3 to 1.8 of the General Terms).
- 3.2 You must have approval from the owner of the Premises to install the Service.

Modem Qualification

- 3.3 In order to receive the Service you must use a compatible modem. You may need to purchase a compatible modem from us as part of your Broadband Service.

Your Broadband Connection Qualification

- 3.4 Your Broadband Service must be supplied by us and must:
- (a) be HLS compatible, that is, any ADSL1, ADSL2 or Naked DSL, VDSL, NBN service (FTTP, FTTB/N, HFC or NBN Fixed Wireless);
 - (b) be capable of speeds greater than 3.5 Mbps for the base iiNet TV with Fetch service (and incremental 3Mbps for any subsequent Service Options added to your subscription); and
 - (c) meet any other service qualifications that we may consider necessary.
- 3.5 Qualification of your Broadband Service can only be estimated at the time of your Application and is subject to a full Serviceability Check upon activation of the broadband connection.

IINET GROUP CRA – IPTV SERVICE DESCRIPTION

Equipment Connectivity Qualification (Generation Three Set Top Boxes)

WiFi

- 3.6 Generation Three Set Top Boxes come with built in Wi-Fi connection (802.11 b/g/n/ac, 2.4GHz/5GHz). You will be able to use this option if your modem is not close to your TV and you have reliable Wi-Fi in the room where your TV is. Where a reliable WiFi connection is not available alternative connection options are outlined below in 3.7 to 3.8.

Ethernet

- 3.7 This is the most reliable connection option if you can run the supplied 1.5-meter Ethernet cable directly from your modem to your Set Top Box. For greater distances, you can use your own Ethernet cable, but you are responsible for any equipment supplied by you.

Power Line Converter

- 3.8 If the distance between your modem and the Set Top Box is greater than 1.5-meters, and the room where your TV is does not have a reliable Wi-Fi connection, you may use a Power Line Converter. You can purchase a Power Line Converter from us or you can use your own Power Line Converter, however you are responsible for any equipment supplied by you.

- 3.9 In order to ensure your cabling configuration is correct and meets the requirements for Service Qualification you may use, at your own discretion and cost, a professional cable installer.

Important information about Power Line Converter

- 3.10 A Power Line Converter may be less effective in homes with multiphase wiring. Your modem Power Line Converter and your Set Top Box Power Line Converter must be on the same phase.
- 3.11 The use of other electric household items can have an impact on your electrical circuit and may degrade the quality of the Service.

Television Qualification

- 3.12 The Television that you intend to use with the Service must have a spare HDMI for the Set Top Box.

Digital Free to Air Qualification

- 3.13 Digital Free to Air channels are accessed via an external antenna connection, provided by you. To qualify for the Service, your digital free to air reception must meet the required standard. The quality of your free to air reception may vary, and accessing these via the Service may not improve this quality. If the reception of your free to air needs to be improved, you will need to arrange this at your own cost (for example, repositioning of the antenna, installing an amplifier, installing new cabling or upgrading your antenna).

Expected Line Capacity

IINET GROUP CRA – IPTV SERVICE DESCRIPTION

- 3.14 We will need to test the capacity and stability of your line to determine whether you qualify for the Service.

Serviceability Conditions

- 3.15 The Service is only available if your Premises meets the following conditions (which may change from time to time):
- (a) the capacity of your Broadband Service must meet the minimum requirements to support the Service;
 - (b) the line attenuation of your Broadband Service must meet the minimum requirements; and
 - (c) you have the correct and working equipment required for the Service (for example, Television, appropriate modem, adequate supply of electricity).
- 3.16 If at any time you no longer meet the Service Qualifications, we may restrict your access to, suspend or cancel the Service in accordance with clause 10.1.

Customer experience of HLS technology

- 3.17 Regardless of the capacity of your Broadband Service, you will receive your Service via HLS technology.
- 3.18 IPTV delivered via HLS traffic is not prioritised over general data. This means that video quality of the Service delivered via HLS technology could be affected by general bandwidth use of the Broadband Service. The video quality rate shifts automatically depending on the available bandwidth at the time of streaming. If there is not sufficient bandwidth to maintain a video stream, the stream will cease and a message will be displayed On-Screen notifying you that there is currently not enough bandwidth to maintain streaming.

4. EQUIPMENT

The Equipment

- 4.1 To use the Service you must have a Television, modem, Broadband Service, Fetch TV Equipment and associated Cabling. The Fetch TV Equipment are supplied with the Service and does not include any other equipment such as modem, Television or other display screen, or Power Line Converter
- 4.2 When we accept your Application, we will order and deliver the equipment specified in your Application. We may delay delivery until all of the equipment in your Application are available and can be delivered as a single package to the address nominated in your Application.
- 4.3 You agree that from time to time, we may require access to the Fetch TV Equipment for any reason relating to this Service including, but not limited to, inspecting the Fetch TV Equipment, installing or maintaining additional equipment and to provide technical
