As previously notified on 18 November 2013 and subsequently on 10 December 2013, the iiNet Group (iiNet Ltd, Westnet Pty Ltd, Internode Pty Ltd, AAPT Consumer Division, TransACT Capital Communications Pty Ltd and Jiva Pty Ltd) is currently working to manage the impact to its network in the Mid North Coast, Hunter, Northern Tablelands and North West Slopes and Plains regions of New South Wales that has occurred as a result of a series of extreme weather events on or about Sunday 10 November 2013 through to Tuesday 12 November 2013.

Large hailstones, damaging wind, heavy rainfall and flash flooding have caused notable damage to the network, rendering some services faulty, as referred to in Telstra Wholesales Mass Service Disruption Notification which can be found at <http://telstra.com.au/abouttelstra/commitments/mass-service-disruption/>. A copy of this notice will also be published in the **Sydney Daily Telegraph on 24 December 2013**.

The iiNet Group is working closely with suppliers and wholesalers to assess and repair the damage to affected services in a timely manner. Customers in these regions may experience service disruptions and delays to normal connection times and fault restoration. The impact in the affected region has been greater than initially estimated and as a consequence of the continued weather effects, the expected date for resumption of normal service operations has been extended to **31 December 2013**.

As these circumstances are outside the iiNet Group's control, iiNet is claiming an exemption under Section 21 of the Telecommunications (Customer Service Guarantee) Standard 2011 from the normal performance standards. The exemption shall apply from **11 November 2013 to 31 December 2013** inclusive. This date is indicative only; customers should anticipate that some further delays may occur.
