iiNet Group reference ID: 4448503

As previously notified on **23 November 2015**, the iiNet Group (iiNet Ltd, Westnet Pty Ltd, Internode Pty Ltd, TransACT Capital Communications Pty Ltd and Adam Internet Pty Ltd) is currently working to manage the impact to its network that has occurred as a result of a series of severe weather events in parts of the Central Wheat Belt and Great Southern Districts of Western Australia on or about Saturday 14 November 2015.

The severe weather events have caused notable damage to the network, rendering some services faulty, as referred to in Telstra Wholesales Mass Service Disruption Notification which can be found at <http://telstra.com.au/abouttelstra/commitments/mass-service-disruption/>. A copy of this notice will also be published in the **West Australian** on **8 December 2015**.

The iiNet Group is working closely with suppliers and wholesalers to assess and repair the damage to affected services in a timely manner. Customers in these regions may experience service disruptions and delays to normal connection times and fault restoration. The impact in the affected region has been greater than initially estimated and as a consequence of the continued weather effects, the expected date for resumption of normal service operations has been extended to **20 December 2015**.

As these circumstances are outside the iiNet Group's control, iiNet is claiming an exemption under Section 21 of the Telecommunications (Customer Service Guarantee) Standard 2011 from the normal performance standards. The exemption shall apply from **18 November 2015** to **20 December 2015** inclusive. This date is indicative only; customers should anticipate that some further delays may occur.
