

NBN™ Key Facts Sheet

This information applies to the NBN™ Exclusive Seniors Card plan delivered on fixed line connections i.e. NBN™ FTTP/B/N/C & HFC, and NBN™ Wireless.

Below indicates your NBN™ plan's typical download speeds and online usage during the busy periods of 7pm - 11pm.

NBN Speed Tier	NBN12	NBN12
Technology	NBN™ FTTP/B/N/C & HFC	NBN™ Wireless
Typical evening speed (7pm-11pm)*	10.3Mbps	Basic
Making phone calls (VoIP)	✓	✓
Email, social media & web browsing	✓	✓
Standard Definition (SD) streaming	✓	✓
High Definition (HD) streaming	×	×
UHD/4K streaming	×	×
# of simultaneous users / devices (approx.)	1-3	1-3

* Your speeds are affected by factors including number of users simultaneously using the network and performance of interconnecting infrastructure not operated by Westnet.

NBN12 indicates the underlying speed tier that your NBN™ plan is on and represent the maximum possible speed that is available outside the busy periods indicated above.

Factors at your premises that can affect data speeds and performance

Poor performance may be caused by...	You may be able to improve this by...
Poor WiFi signal strength or signal interference	Connecting devices via Ethernet cable or by placing modem in an unobstructed area.
Modem, WiFi router or network cables	Using current hardware with technical specifications suitable for your NBN™ plan.
Too many simultaneous users	Managing your household usage according to the above guide.

If your plan is delivered on NBN™ FTTP/N/C, your speeds are affected by the length and quality of the copper used by NBN Co. Around 3 weeks after activation NBN Co will determine your maximum line speed. If your line cannot support the speed tier that your NBN™ plan is on, we'll send you an email stating your line speed results and your options, including the option to move to a lower speed plan (if available) or to cancel your service and change providers without contract break fees. Both options include a specified refund for speeds you cannot receive. If you select to cancel your service and change providers within 10 working days of being sent the email, you will receive a refund of charges paid (including set up costs).

In the event of a power outage: NBN™ services will not function except for NBN™ FTTP services with a working battery backup unit installed.

Medical and security alarm services: Before switching to NBN™, please contact your alarm provider to assess whether your alarm is compatible with an NBN™ service and identify available alternatives if your alarm services are not compatible.
