

## Media Release

### iiNet's 12 Days of Online Safety brings a safe and secure silly season

**7 December 2011** – iiNet, Australia's second largest DSL broadband provider, has released a festive-themed online safety fact sheet to help Internet users keep their cyber security in check over the holiday period.

Dubbed "iiNet's 12 Days of Online Safety", the factsheet offers 12 tips which can be followed in the lead up to Christmas to help minimise security risks when using personal computers and devices.

iiNet's Compliance Manager, Rebecca Moonen, said school holidays and time off work at Christmas often means more time is spent surfing the web.

"It's a busy and stressful time of year, so it's important we all take a little extra care when shopping, accessing services like banking and keeping in touch with friends and family online," Ms Moonen said.

"Following our 12 Days of Online Safety fact sheet is an easy way to up the ante on your cyber security measures, making way for a very merry Christmas."

iiNet's 12 Days of Online Safety can be downloaded from iiNet's website – [www.iiNet.net.au/safety](http://www.iiNet.net.au/safety).

iiNet's Online Safety Series was introduced to help Australians become more aware of safe practices when surfing the web. Each month, information will be released and made available for download from the iiNet website.

Topics covered by the safety series include social networking, online shopping, phishing emails and password security.

To learn more about iiNet's Online Safety Series or to register interest in an Online Safety Seminar visit [www.iiNet.net.au/safety](http://www.iiNet.net.au/safety).

## **About iiNet**

iiNet is Australia's second largest DSL Internet Service Provider (ISP) and the leading challenger in the telecommunications market. We employ more than 2000 inquisitive staff across four countries and support over 1.3 million broadband, telephony and Internet Protocol TV (IPTV) services nationwide.

We're a publicly listed company and we maintain our own super-fast broadband network. Our vision is to lead the market with products that harness the potential of the Internet and then differentiate with award-winning customer service.

To achieve this, we employ creative thinkers and true advocates of technology. Our people are a huge part of the iiNet success story, so we've developed a unique and stimulating work culture to ensure they remain engaged and inspired.

A lot has changed since our CEO founded iiNet in a suburban garage back in 1993 and the broadband landscape continues to evolve. What hasn't changed is our passion for the transformative benefits of the Internet and our commitment to helping Australians connect better.
